THE SCIENCE BEHIND COVID-19

Cartoonist Sonny Liew and NUS Saw Swee Hock School of Public Health infectious diseases expert Hsu Li Yang have worked together to explain the science behind Covid-19 and how it impacts health, since the pandemic began. With vaccinations starting in Singapore, they have come up with a new piece outlining what is known and addressing concerns people may have about vaccines.

Doctor Duck explores that due to the urgent need to tackle the pandemic, huge amounts of resources have been thrown at the problem, and the entire process has been accelerated...

Despite each measurement, Old Male, finding himself in the elderly category, and therefore first in line for the vaccinations along with healthcare and other frontline workers, still worried...

Examiner Coronavirus,

This talk of travel and gatherings, of course, brings up a question that has been on everyone’s mind —

And so let the pandemic have a lasting tracer in the best possible ways...

... making us more aware of hygiene, pathogens...

... and a memory of how science and human cooperation can help us overcome the challenges that come our way.
