SUMMER COURSE BOOK
Assalamu'alaikum Warahmatullahi Wabarakanuh,
Om Swastiastu, Namo Buddhaya, Salam Kebajikan

Nice Greetings from Universitas Padjadjaran

COVID-19 pandemic has shifted the people lifestyle and their way of communication one another. These situations create communication gap especially the one related to international and intercultural communications in different countries. Different ethnic, culture and language supposed to create difficulties and hinderances on the international student mobility among countries. Although the situation is uneasy, the international relations and collaborations should keep standing and developing. In that case, together we can learn one another to handle this critical situation through redeveloping the international mobility especially Summer Program.

A strategic collaboration among Universitas Padjadjaran (UNPAD) and other overseas universities by participating Unpad Summer Program 2023 will be one of breakthrough for reinitiating network of international mobility with all partners abroad and resetting our common strategy to encounter the academic challenges and internationalization after pandemic.

Furthermore, Unpad Summer Program could also be a melting pot for all international and domestic students to connect one another and bridge the academic and intercultural understandings among them. Unpad Summer Program will provide a knowledge, experience and new horizon perspectives on academic and culture internationalizations after pandemic. It is expected that more participants from different countries will take a part in Unpad Summer Program as well as bring home a high spirit of internationalization. Finally, welcome and join Unpad Summer Program 2023 to become the part of the big family of Universitas Padjadjaran family, the beneficial and global university.

Wassalamu'alaikum Warahmatullahi Wabarakanuh,
Om Shanti Shanti Shanti Om, Namo Buddhaya, Salam Kebajikan.

The Faculty of Psychology of Padjadjaran University is the first faculty of psychology in Indonesia, which has lots history in the development and use of Psychology in Indonesia. As a Faculty that has been established since 2nd September 1961, we are proud of the history of the founding of the Faculty of Psychology UNPAD which began with the founders of the faculty who were prominent psychology figures in Indonesia. We are ready to achieve our vision of becoming an excellent higher education provider at the regional and international levels in the development of knowledge and the application of psychology for the welfare of humanity.
Course Details
This 5-day Summer Course that will be held on July 2023 aims to develop participants' knowledge regarding the basics and application of a more comprehensive psychological intervention. Through this course, participants can learn and share their experiences on psychological intervention in various settings and at the same time, we'll ensure to give you a taste of Indonesia's various cultures as well*

*) the latter is not available if participants chose the online option

Topics
1. Evidence-Based Psychological Intervention
2. Developing and evaluating psychological intervention
3. Psychological intervention in emergency settings
4. Psychological intervention in school
5. Psychological intervention in the workplace
6. Psychological intervention in clinical settings/health settings
7. Digital psychological intervention

Prerequisites
This course is eligible for students and professionals (lecturers, researchers, etc.) in their respective fields.

Benefits
1. Participants will receive in-depth knowledge and skills regarding psychological interventions.
2. Participants can have the opportunity to explore Bandung and learn about one of many Indonesian cultures*
3. Participants will receive the equivalent of 2 credits upon completing this course.
4. Participants will receive e-certificate
5. Participants will receive course materials

*) only available in offline option
Costs
Participants may join this course via 3 different ways, which is:

   • 1x lunch and 2x coffee break a day
   • Breakfast**
7. Medical Kit (masker, hand sanitizer)*
8. Pick up transportation on select hours from Soekarno-Hatta International Airport to Unpad Training Centre *
9. Lodging for 5 nights (Monday night - Friday night) **
   • 1 room for two people

Description:
* : For all offline participant (both include and exclude accommodation)
** : Only for offline participants with accommodation.
Faculty of Cultural Sciences (FIB) Unpad previously known as the Faculty of Letters, was founded on 1 November 1958 with the Decree of Yayasan Pembina Universitas Padjadjaran No. 6/FS/531 dated 1 October 1958 regarding The Establishment of the Faculty of Letters. After two years, it was legalized with the decree of Minister of Education, Pedagogy, and Culture No. 66971/UU/60 dated August 12, 1960 making the Faculty of Letters became the first 8th faculties established in Unpad.

The Faculty changed its name into the Faculty of Cultural Sciences during its development in 2012. University Senates, then, legalized the changing on 5 January 2012. Thus, the graduates of FIB Unpad are qualified to actively communicate in languages they have learned both verbal and non-verbal, as well as to comprehend linguistics, literature, and philology. In addition, the graduates are equipped with pragmatic knowledge, like tourism and entrepreneurship.

Three aspects are upheld in scientific context of the Faculty, i.e. culture that leads to humanities, culture that leads to arts, and culture that leads to languages. These aspects deliver the faculty as the excellence in its field compared to any other similar faculties in other universities.

Universitas Padjadjaran
Fisheries and Marine Sciences

The Faculty of Fisheries and Marine Sciences Unpad held an International Summer Program as a manifestation of one of the visions of FPIK Unpad and the goal of the Internationalization Unit of FPIK Unpad, namely as a liaison between foreign students and FPIK Unpad. The previous International Summer Program has been held with an online course method using the Zoom Meeting media platform. The purpose of the activities to be held is to increase the knowledge, experience, and relationships of the participants.

This program offers international students from various disciplines and backgrounds who are interested in the Sustainable Blue Economy. Human relations with the oceans, and how people use and exploit their resources, are evolving in important ways. While the oceans are increasingly becoming a source of food, energy, and products such as drugs and enzymes, there is also now a better understanding of the non-market goods and services that the oceans provide, which are essential to life on Earth.

The Faculty of Fisheries and Marine Sciences also supports the blue economy movement by contributing to the preservation of fishery resources. This is intended to achieve one of the Sustainable Development Goals (SDGs) number 14 regarding marine and fisheries. The development of the fisheries sector cannot only focus on the fisheries sector, but is largely determined by the ecosystem and various other sectors. Universities are also expected to become centers of excellence in the SDGs.

The role of the Faculty of Fisheries and Marine Science is also expected to be stronger to support the achievement of SDG number 14. Therefore, the title of our Summer Course Program 2022 is "The Global Strategy of Blue Economy: Challenge, Potential, and Development" which consists of 2 (two) credits with an additional 1 (one) credit if the student goes on a Virtual Trip, the total coursework is one week or seven (7) working days for this summer course session from 12 September 2022 to 18 September 2022.
Aim and Objective
1. Mead insights on Marine Tourism to the foreign students and domestic students
2. Improving educational atmosphere FPIK Unpad be better equipped to realize the World Class University
3. Expanding international networks to improve collaboration education and research
4. Increase knowledge of participants who will have an impact on improving the quality of the participants with the holding of the Virtual International Summer Program
5. Improved number of foreign students (inbound)
6. Increased research collaboration, for example in the format of joint research, joint publications, international research consortium, and others

Schedule
**Period** : Four (4) weeks
**Time** : August (Every Year)
**Place** : Universitas Padjadjaran, Bandung and Jatinangor, West Java (The Program Carried Virtually For The Last 2 Years, Soon to be Onsite)
Program Activities

- **Courses**
  The course is conducted online using the LMS MOOC (Massive Open Online Course), which will be delivered by international lecturers for seven working days totaling two credits.

- **Virtual Trip**
  Due to pandemic Covid 19, the field trip will be held virtually to the famous marine tourism places located in West Java. While the students cannot go physically to see the view of the beach, traditional ambience, and natural biodiversity up close, a digital tour allows for more intimate behind-the-scenes access.

- **Painting Batik**
  Batik is a technique of wax-resist dyeing applied to the whole cloth. This technique originated from the island of Java, Indonesia. Batik is made either by drawing dots and lines of the resist with a spouted tool called a canting, or by printing the resist with a copper stamp called a cap.

- **Cultural Exchange**
  Cultural exchange is sharing different ideas, traditions, and knowledge with someone who may be coming from a completely different background. Examples of cultural exchange programs include student exchanges, sports exchanges, and scholarly or professional exchanges, among many others.
Participants and Lecturers

Participated Countries
Our summer program is open to students at the bachelor's or master's level from around the world.

Lecturers
Our Summer Program is taught by leading researchers of Faculty of Fisheries and Marine Sciences and International lecture from around the globe.

Faculty of Animal Husbandry was founded by Prof. Dr. Didi Atmadilaga, and inaugurated on 1 September 1963.

Vision: Become a faculty that committed to excellence in knowledge and technology of sustainable animal husbandry, and internationally competitive in 2024.

The faculty of Animal Husbandry has 13 laboratories from 4 departments, namely:
1) Livestock production,
2) Animal nutrition & feed technology,
3) Animal products & processing technology, and
4) Social & economic of sustainable animal husbandry.
I. Virtual Summer Course

Course Description

Virtual Summer Course by the Faculty of Animal Husbandry, Universitas Padjadjaran is here for the first time to give both national and international students alike a chance to learn about local beef cattle production. The topic, covering from breeding, nutrition, production, economy, until final processing, will be taught by our university's lecturers and from our cooperating universities. We'd also introduce local and international students to our faculty, our lecturers, and the works we've been doing.

The topic will be taught by our university's lectures and from our cooperating universities. We would also introduce local and international students to our faculty, our lectures, and the works we have been doing. Hopefully, you would not only gain new friends and a knowledge, but also be interested in continuing further studies and developing collaborations with us!

Virtual Summer Course Benefits

- 2 Credits
- Certificate & Transcript
- Networking
- Learning materials

Time & Place

Time: August 2023 (to be determined)
Place: Online-Universitas Padjadjaran, Sumedang Indonesia

Prerequisites

This course focuses on breeding, nutrition, production, economy, until final processing of animal livestock. Participants would be expected have some familiarity with agriculture, biology, veterinary, and animal science.
Course Overview
This course is split into several topics with a mixture of short theoretical lectures and practical sessions.
The materials cover the following topics:
- Beef cattle breed reproduction
- Local beef cattle production
- Nutrition for beef cattle
- Beef cattle business process
- Beef cattle health and welfare

II. Virtual Autumn Course

Course Description
Virtual Autumn Course by Faculty of Animal Husbandry, Universitas Padjadjaran collaborated with Faculty of Agro-Based Industry, Universiti Malaysia Kelantan is here for the first time to give both national and international students alike a chance to learn about Sustainable Agriculture Ecosystem for Ensuring Food Security. The topic will be taught by Universitas Padjadjaran's lecturers and Universiti Malaysia Kelantan's lecturers. We'd also introduce local and international students to our faculty, our lecturers, and the works we've been doing. This course deals with the roles and concepts of a sustainable food supply chain as one of the most important elements in agro-based industry. Food supply chains include the integration of farmers, processors, distributors, and other participants in food production and distribution. The subject content also emphasizes the significant contribution of agri-food supply chains in order to reduce waste, encourage a green economy, and ensure the freshest of foods are transported in the safest, and most efficient manner possible. Besides, students also will be exposed to the standards of agrifood supply chains in order to produced certified products which contribute to the national and global food safety and security. The students will be evaluated based on the theories and discussions during the class. At the end of this course, students will be able to discover and discuss the concepts and importance of food supply chain.

Virtual Autumn Course Benefits
- 2 Credits
- Certificate & Transcript
- Networking
- Learning materials

Time & Place
Time: November 2023 (to be determined)
Place: Online-Universitas Padjadjaran, Sumedang Indonesia & Universiti Malaysia Kelantan, Malaysia

Prerequisites
This course focuses on topics that highlight major components that drive sustainability in supply chains in terms of environment, economic viability, and social responsibility. Also, we will discuss about the challenges and opportunities of food supply chains for all stakeholders involved in bringing products and services to market. Participants would be expected have some familiarity with agriculture, biology, veterinary, and animal science.
Course Overview

This course is split into several topics with a mixture of short theoretical lectures and practical sessions. The materials cover the following topics:

- Introduction to Agriculture
- Application of Agriculture Technology
- Application of Livestock Technology
- Post Harvest Technology
- Farm Management
- Waste Management
- Introduction of Food Security
- Agribusiness
- Halal Product Development
- Downstream Processing
- Food Safety and Hygiene Control

Social and Political Sciences

Introduction
Faculty of Social and Political Sciences was established on 1958 as one of the faculties in Universitas Padjadjaran, under the name of Faculty of Public and Business Administration. In 1960, the faculty name was changed into Faculty of Social and Politics, and finally changed into the Faculty of Social and Political Sciences in 1983 based on the Ministry of Education and Culture Decree No. 1574/1/1983.

Currently, the Faculty of Social and Political Sciences provides in total 25 degree programs ranging from undergraduate (bachelor and vocational) to graduate (master and doctoral) programs in the field of social and political sciences. As of 2022, there are in total approximately 4987 students enrolled at the Faculty of Social and Political Sciences.

As part of the commitment to deliver high-quality education for both Indonesian and international students in the diverse field of social and political studies, the Faculty has also strengthen its collaboration with diverse partners in Indonesia and abroad. The Faculty has approximately 47 active international partners from 17 countries, with collaboration activities in teaching and research.
About the program
The International Short Course Program is a one-month summer course program offered by the Faculty of Social and Political Sciences of Universitas Padjadjaran (UNPAD) for international students from all universities globally as well as UNPAD students. Students will have the chance to participate in both academic and non-academic activities to broaden and enrich their experiences of Indonesia and Indonesian cultures while studying at Universitas Padjadjaran as one of the oldest and most prestigious universities in Indonesia, located in the city of Bandung, West Java.

Schedule
Period: Four (4) weeks
Time: July-August 2023
Place: Faculty of Social and Political Sciences, Universitas Padjadjaran, Bandung and Jatinangor, West Java

Program’s Courses
Participating students will enroll in a compulsory academic preparation class and can choose to enroll in diverse courses introducing various social and political subjects in Indonesian and global contexts (minimum of four courses). Students will learn through case-based and interactive learnings; while also engaging with other fellow students in the Faculty of Social and Political Sciences. During their stay, they will also participate in cultural and entrepreneurial programs.

1. Academic Preparation Class (Indonesian Language, Cross-Cultural Understanding)
2. Society, Culture, and Development*
3. Politics and Democracy*
4. Public Policy and Governance*
5. Foreign Policy and International Relations*
6. Social Welfare Design and Policy*
7. Digital and Creative Economy*

* Students can choose four courses among the six offered courses
Activities

- Participation in chosen courses taught by the faculty members from the Faculty of Social and Political Sciences UNPAD and invited international lecturers from partner universities
- Cultural excursion and engagement, interactive learning (i.e. Asian African Conference Museum,

Mathematics and Natural Sciences

SUMMER COURSE: PROMOTING AND CREATIVITY RAMIE AS NATURAL FIBER

Introduction
Faculty of Mathematics and Natural Sciences (FMIPA) was founded through the Decree of Education, Pedagogy, and Culture Minister No.102.333/S dated 22 October 1958. The former president of Republic of Indonesia, Ir. Soekarno, officially established FMIPA on 17 November 1959.

Faculty of Mathematics and Natural Sciences (FMIPA) carries a vision to be the leading faculty in ASEAN by 2020, and missions: (1) to implement research-based learning to produce high competitive graduates; (2) to conduct basic and applied science research especially in the management of natural resources and environment that is beneficial to social welfare.

The faculty continuously encourages students to be qualified graduates that complete their study on time and are immediately employed. Faculty of Mathematics and Natural Sciences (FMIPA) supports research that focuses on downstream products, the increasing of international scientific publication, and the acquisition of Intellectual Property Rights (HKI) for scientific products.
Prerequisites
This course focuses on creativity, biomaterial, and bioresources of ramie (*Boehmeria nivea*) as natural fiber for introduce and promoting to the international students. Participants would be expected have some familiarity with ramie natural fiber and production of creative products.

Topics
This course is split into 5 topics with a mixture of a short theoretical lectures and practical sessions. The materials cover the following topics:
1. Ecosystem services in sustainability bioresources
2. Ecotechnology of rami: cultivation and biomass processing for zero waste concept
3. Innovation for technological fiber processing: degumming, bleaching, spinning, and weaving
4. Innovation for ramie processing for creative products: home décor and batik
5. Advanced technology of nanofiber

Schedule
**Time:** July – August 2023 (to be determined)
**Place:** Universitas Padjadjaran, Bandung, Indonesia

Cost
**Local student:** IDR 300,000
**International student:** USD 30

Further Information
**Registration link**

fmipa.unpad.ac.id

**For inquiries**
fmipa@unpad.ac.id
Course Description

Utilization of bioresources needs to be carried out with a sustainable, namely through the development of bioprospecting of bioresources activities that are systematic search, classification, and investigation for commercial purposes from sources of new chemical compounds, genes, proteins, microorganisms, and other products with actual and potential economic value found in biodiversity.

Natural Fiber are fibers that are produced by geological processes, or from the bodies of plants or animals. They can be used as a component of composite materials, where the orientation of fibers impacts the properties. Natural fibers can also be matted into sheets to make textile material, paper, or felt.

Textiles and Textile Products (PTP) as a national strategic industry has the potential to become a source of foreign exchange for the country and absorb a large number of workers. Indonesia as a top 20 exporter for TPT and towards the top 5 exporters in the world (Year 2030), has problems with the availability of raw materials for TPT, especially polyester and rayon which have not been able to meet TPT production, especially the import rate of cotton fiber is 99%.

Indonesia’s climate favors the growth and production of ramie compared to cotton. The characteristics of ramie fiber have advantages over cotton fiber. Fulfilling the need for raw materials for cotton substitution, both domestic and has the opportunity for export prospects. The innovation of ramie-based creative products can boost various other creative industry sectors.

Summer Course Program “PROMOTING AND CREATIVITY RAMIE AS NATURAL FIBER” is designed for serving international students to study in Faculty of Mathematics and Natural Science, Universitas Padjadjaran. This Program will be held by The Central for Study of Natural Fiber and Bioresources (BNFB).
The Faculty of Agriculture (Indonesian: Fakultas Pertanian, abbreviated as Faperta) Universitas Padjadjaran was officially established on September 1st, 1959. This faculty is highly committed to contributing to the development of the agricultural sector in Indonesia. Initially, the faculty secretariat was located at Jalan Dipati Ukur No. 37 Bandung, with the classes being spread all over different areas. Later on, the secretariat was moved to Jatinangor in September 1986.

The Faculty of Agriculture at Universitas Padjadjaran offers a variety of study programs, including undergraduate, postgraduate, and vocational programs. The study programs are set to develop the productivity, quality, and efficiency of the nation’s agriculture sector, as well as to support its sustainability.

To maintain and improve the quality of education and research, the faculty is currently collaborating with numerous universities and institutions, both public and private, on the national and international scope. All of the faculty members are also required to have been awarded either a Master’s or doctoral degree from any reputable national or international university.

The alumni of the Faculty of Agriculture are proven to not only be successful in the field of agriculture as well. They are also capable of competing in several other fields, as there are plenty of alumni who are entrusted with honorable positions in many public and private institutions.
Course Details
International Summer Course Unpad (ISSU) is an annual program held by Faculty of Agriculture, Universitas Padjadjaran. This year, this program will be held on August to September, for two weeks. ISSU participants can choose to join this program virtually (online) and offline in Unpad Jatinangor campus. We welcome local and overseas Agricultural student to join ISSU as participants.

Timeline
2 weeks on August - September 2023

Cost
OFFLINE
250$ foreign student
150$ local student
*accommodation not included

ONLINE
50$ both foreign/local student

*discount for collaborator institution

Activities
1. Seminar
2. Student conference
3. Focus group discussion
4. City/village tour
Course Description
This summer course provides a comprehensive overview of women’s health and child health in developing countries. Maternal chronic illness and poor general health, particularly during pregnancy and in the year after childbirth, are increasing public health concerns as they contribute to poor health outcomes for both mother and infant. The incidence of maternal morbidity in hard to reduce in Indonesia and all developing countries as we have different sets of problems, setback and challenges unique to Indonesia. With an enthusiastic team of experts from premier university and tertiary hospital in Bandung, West Java, Indonesia, we will discuss the major challenges which women and children in developing country are facing, and we will look at potential solutions, which will provide participants with insight, understanding, and ideas of problem solving of mother and child care problems.

Participants will experience what it’s like to work in the pioneering health and research centres of Hasan Sadikin Hospital and primary health care in Bandung, West Java, Indonesia. Participants will have the opportunity to interact with consultants, junior doctors, midwives, nurses, patients, families and students in Bandung, West Java, Indonesia. The programme is a variety of interactive workshops, lectures, practical simulation classes and clinical attendance. Participants are given the opportunity to use simulation facilities to learn important practical skills such as communication skill, early detection, holistic approach in non-communicable disease, malaria, and mother and child health.
Learning Outcome

When this course finish, we hope participants will gain:
1. Education and counseling in mother and child health.
2. Understanding and be able to undermine the problem in cases in mother and child health.

Prerequisite (if any)

The participant consists of 3 groups of applicants, which later act as two big groups:
- Applicants was invited from Medical Faculty overseas, 2-3 person. The fundings and accommodation was provided by Padjadjaran University, except travel expenses.
- Applicants was also invited from Medical Faculty inside Indonesia and overseas, 7-8 person. The fundings and accommodation was personal expenses.
- 10 persons participants are taken from Padjadjaran University Medical Faculty, to be Liaison Officer and at the same time elective participant.

Resource Persons

- Dr. dr. Hadi Susiarno, Sp.OG Subs Obginsos, M.Kes, MH.Kes
- dr. Dini Pusianawati, Sp.OG Subs Obginsos
- dr. Mulyanusa Amarullah Ritonga, Sp.OG Subs FER, M.Kes

Workplan
All of the attendees will be supervised by two consultants from OBGYN Department for two weeks in decided location. House-rent or house living with local citizen serve as accommodation for all the attendees.

Or

All of the attendees will be entrusted to local village or Puskesmas (local public health centre) and for two weeks full, roadshow is performed to visit Posyandu in Puskesmas service area

During the programme, several collaboration plan to be perform, such are:
• Collaboration with GenRe programme (Instagram @genre_indonesia)
• Reproductive health promotion to Karang Taruna
• Location: Pameumpeuk or Pangandaran (centre supervised by UNPAD Public Health), West Java.

MEDICINE
Tropical Diseases Malaria From Bench To Community: a Threat Behind The Beauty of Pangandaran

Course Description
Today's public health problems are increasingly facing complex challenges. Indonesia's problem is primarily related to tropical infections as a tropical country. Various diseases: Malaria, dengue, filariasis, leprosy, yaws, and soil-transmitted helminths, cast a shadow over the Indonesian population.
The ministry of health has formulated a malaria program policy to achieve the 2030 malaria elimination target by strengthening: (1) diagnostic; (2) treatment; (3) surveillance; (4) vector control; and (5) health promotion. The diagnosis of Malaria must be up within 48 hours. However, limited human resources have become a problem because microscopic examination requires an expert to examine and interpret the results.

Strengthening surveillance is also essential in case findings and spatial epidemiological investigations. Examination of Plasmodium spp. in humans and vectors is a part of a spatial epidemiological study to obtain integrated data and a warning system in identifying risk factors for mitigation and preparedness. Problems regarding examinations for surveillance that require molecular analysis are considered challenging because they consider costs, laboriousness, cold chain, and experts.
Based on the epidemiological triangle, besides the agents and hosts, environmental factors have a major role in the risk of disease transmission. Assessment regarding environmental analysis is critical to be carried out as part of a comprehensive effort to achieve elimination. Using a Geographic Information System (GIS) can facilitate data collection with spatial (location latitude longitude) and temporal (time) information and thus can support the interpretation of risk area mapping.

Disease detection using standard molecular biology techniques and even more vector surveillance in low-resource areas are hampered by the lack of affordable lab instruments in portable settings. Universitas Padjadjaran is concerned about these problems and contributes by creating "Padulab Jinjing", a portable laboratory with an integrated system that is easy to carry to the field and used to carry out surveillance for plasmodium detection in humans and vectors. This innovation is a breakthrough in time and cost efficiency, minimizing cold chains to support diagnosis and surveillance in limited areas (public health centers and remote areas). Integrated into this summer course's program are the field test and implementation of the mobile lab system for malaria vector surveillance.

As one of the most prominent universities in Indonesia, Universitas Padjadjaran will organize courses to provide comprehensive learning facilities about tropical infections, especially Malaria. This course is intended for students from various countries. The participants taking this course will study Malaria, starting from diagnostics, vector identification, surveillance, and GIS.

The venue will be in the Pangandaran area of West Java. Pangandaran beach is also one of the well-known destinations for holidays and surfing.

## Learning Outcomes

- To understand Malaria’s agent, vectors, and habitat
- To understand conventional and molecular malaria examination (identification of Plasmodium spp. in larva and mosquito) and to be able to examine the field
- To understand integrated malaria surveillance
- To understand community participant in Malaria elimination
- To understand mapping of receptive area for Malaria vector

## Prerequisite (if any)

- Not suffering from covid-19 (proven by carrying out a PCR screening before the course starts)
- Physically and mentally healthy for the field trip

## Resource Persons

- Dr.rer.nat. Savira Ekawardhani, M.Si.
- Fedri Ruluwedrata Rinawan, dr., M.Sc.PH., Ph.D.
- Lia Faridah, dr., M.Si., Ph.D
- Riki Ridwana, S.Pd., M.Sc.

Community-based Prevention and Promotion of Non-Communicable Diseases

Course Description
The prevalence of metabolic related Non-Communicable Diseases (NCD) in Indonesia are high. Various risk factors have contributed, and led to low awareness and then missed diagnosis and complications. Promotion and prevention measures have already been done from the very top to the lowest level of health facilities, but the result has not been seen yet. The problems were subject to exploration. Community as a target of the promotion and prevention program is the most important source of information but seldom approached.

Community is naturally unique, promotion and prevention programs, despite its main aim, should be built based on their own uniqueness. The Sundanese (origin ethnic of West Java community), particularly in Sumedang District, has its own tradition and local concept, which could increase risk factors of NCDs. Exploring those traditions and local concepts; linking it to the development of disease are both challenging and fun. Working together with Community Health Volunteers will give us a different perspective of health promotion and prevention in the West Java context.

Experts in epidemiology, internal medicine, cardiology, public health, health communication and health anthropology will lead the course, together with health district and community health officers as well as students' organizations, CIMSA and AMSA. We ensure that the experience will be fruitful and inspiring. This course aimed to facilitate the students to identify the problems of Non Communicable Disease in the community through a data collection process, explore probable solutions and develop ideas to overcome those problems.
Learning Outcome
1. Experiencing data collection process (qualitative and quantitative)
2. Identify problems regarding NCD prevention in the community
3. Analyse the health situation based on socio-cultural and public health perspective
4. Design alternative solutions based on the problems
5. Advocate the selected solutions to the community and health district officers

Prerequisite (if any)
Knowledge and (a little) experience of Design Thinking/Problem Solving Cycle (certified or self-learning) will be helpful

**Collaborators**

Asian Medical Students' Organization (AMSA) UNPAD and Center for Indonesian Medical Students' Activities (CIMSA) FK UNPAD will be our collaborators in this summer course. AMSA and CIMSA will be responsible for the cultural experiences for the participants as well as become the Liaison officers (LO) for the participants.

AMSA is a medical students' organization that represents medical students from across Asia-Pacific. With its vision of Knowledge, Action, and Friendship, AMSA wishes to be the home for medical students where members could reach their utmost potential. AMSA has their own exchange program called AMSEP, and AMSA UNPAD has experience in hosting it as well as sending their members to participate.

CIMSA is a medical students' organization affiliated with International Federation on Medical Students Affiliation (IFMSA) which works within six Standing Committees, some of them are in the field of Public Health, Professional Exchange and Research Exchange. CIMSA FK UNPAD has lots of experience in hosting incoming international students, with their last hosting was 19 incoming students in Professional Exchange and 4 students in Research Exchange.

Transcendent 202: Transformative Summer Elective Course In Dentistry

It is a three weeks summer program for international students to study various dentistry subjects. It was first held with a hybrid method in 2019 involving 87 international students, and during the pandemic, it was held successfully in a fully online program involving 190 participants from 10 countries.

In 2023, we invites international students to visit our campus, learn with our experts, and interact with our students and get astonishing experience.
Cost
The program offers a series of activities that will broaden your intellectual scope and sharpen your skills in a comfortable learning environment enriched with Indonesian, especially West Java cultural experience with only 585 USD.

Benefits
1. 2 Credit System Units or equivalent to 3 ECTS
2. E-certificate
3. Varsity jacket and other essentials (tote bag, note book, pen, etc.)
4. Excursion package

Students are responsible for all travel costs, health insurance, accommodation, and board fees.

## For Inquiries

Inquiries can be sent to:  
international.fkg@unpad.ac.id  
Faculty of Communication Sciences offers nine programs consisting seven undergraduate and two postgraduate programs.

These programs are managed under three different departments. The first one is the Department of Communication and Information, which manages the Communication Sciences (Bachelor) Program, the Library and Information Sciences (Bachelor) Program, the Communication Sciences (Master) Program, and the Communication Sciences (Doctoral) Program.

The second one is the Department of Mass Communication, which manages the Journalism (Bachelor) Program, the Television and Film (Bachelor) Program, as well as the Media Production Management (Applied Bachelor) Program.

The third one is the Department of Corporate Communication, which manages the Communication Management (Bachelor) Program and the Public Relations (Bachelor) Program.
WEEK 1  
11-15 DECEMBER 2023

CULTURAL LITERACY AND GLOBAL SOCIETY  
DECEMBER 2023

COURSE DESCRIPTION & LEARNING OUTCOMES
Course participants will learn about the importance of studying culture through the traces of civilization preserved in cultural institutions such as ancient libraries, museums and cultural heritage sites. The learning will be delivered in the form of presentations of course material and discussions as well as the visualization of the cultural institutions' examples.
