NUS to expand entrepreneurship scheme that has created unicorns

Annual capacity to double to 600 students in 5 years; new overseas destinations added

Source: The Straits Times, pA4 Date: 5 December 2022

A programme credited with fueling the startup ecosystem in Singapore will get a major boost with the establishment of NUS Enterprise. The National University of Singapore (NUS), which has produced 31 unicorns, or startup companies with an estimated market value of more than $1 billion, will expand its new overseas destinations to Europe, China, and Japan.

When the National University of Singapore (NUS) launched one of Asia’s first 20-year-old startup programmes in 1992, Dr Lim Hyeong, who was then Mini-
