Eligibility Guidelines for MOE Subsidy
(MOE-Subsidised Graduate Programmes)

(1) Students with a Higher Degree Qualification

Students (all nationalities) who already hold a higher degree qualification and wish to pursue a second graduate programme of the same or lower level might be eligible for the MOE subsidy provided the fees for their first higher degree qualification attained were not subsidised by the Singapore government or sponsored by a Singapore government agency (such as scholarships offered by the Ministries, Public Service Commission and Statutory Boards for both their local and overseas graduate programmes).

Students who have previously enjoyed government subsidies/scholarships in a graduate programme will not be eligible for MOE subsidy in another graduate programme at the same or lower level. Instead, such students will be liable to pay a higher fee without MOE subsidy for the graduate programme that they now wish to undertake. For example, students who had previously enjoyed subsidies/scholarships in a Master’s programme, and have attained the Master’s degree will not be eligible for subsidy in another programme at Master’s degree or lower level. For such students who are upgraded from Master’s to PhD, if their date of upgrading is after Instructional Week 2 of the semester, the subsidy will only be effective the following semester. In addition, if they are upgraded to a programme which has a combination of Master’s and PhD candidature, they will not be eligible to enjoy subsidy during the Master’s candidature.

(2) Transferred or Readmitted Students

Students (all nationalities) who did not complete an earlier graduate programme (i.e. ‘original’ programme) and are now transferred or readmitted to another programme (i.e. ‘new’ programme) at the same level within NUS or across Autonomous Universities (AUs) will be eligible for MOE subsidy based on the following formula:

For transfers prior to AY2022/23

\[
\text{Duration of new graduate programme} - \text{Equivalent no. of semester(s)} \times \text{of government subsidies/sponsorships received for original graduate programme}
\]

For transfers from AY2022/23 onwards

\[
\frac{\text{Remaining SE}^* \text{ from original graduate programme}}{\text{Total SE for original graduate programme}} \times \text{Total SE for new graduate programme}
\]

*Subsidy Eligibility. Refer to Annex A for the full glossary.

In instances where the computation of SE does not produce a whole number, the number of semesters will be rounded up to the nearest whole number.

For all transfers, subsidies for the new programme would not be retrospectively provided, whether due to the exceeding of the Normal Candidature Period of the original graduate programme or other reasons.

As at 31 Jul 2023
The transfer funding framework effective 13 July 2022 is elaborated in Annex B with examples shown in Annex C - For transfers between different MOE-Subsidised Graduate Coursework programmes (GDC-GDC transfer) or transfers between a MOE-Subsidised Graduate Coursework programme and a Graduate Research programme (GDC-GDR transfer) or from modular courses to Graduate Coursework/Masters by Research programme.

For transfers between different Graduate Research programmes (GDR-GDR transfer), the SE is the Maximum Candidature Period of the new programme less the equivalent number of semester(s) of government subsidies/sponsorships received for the original programme.

Duration of new programme is defined as such:
- with effect from Semester 2, AY2008/09, it refers to Maximum Candidature (MCD) Period for Research-based programmes.
- with effect from Semester 1, AY2019/20, it refers to Normal Candidature (NCD) Period for Graduate Coursework programmes.

For admission to programmes of different levels, please refer to (1) Students with a Higher Degree Qualification above.

Note: Please note that all calculations are subject to verification with the AUs to ensure accuracy.

NUS is authorised to obtain and verify the information provided by student or otherwise, with any source as it deems appropriate. In the event of inaccurate, incomplete or false information given by student regarding previously consumed and eligible MOE Subsidy for graduate programmes, NUS may at its discretion withdraw any offer of admission made or, if already admitted, may be liable to disciplinary action, which may result in expulsion from NUS.

(3) Conversion of Academic Workload

According to the transfer funding framework for government-subsidised graduate coursework programmes, students who convert their academic workload (from full-time (FT) to part-time (PT) or vice versa) will be eligible for MOE subsidy in their converted programmes as follows:

| a) FT to PT: SE* for PT programme = NCD of new PT programme – (Number of subsidised semesters consumed under original FT programme x 2), rounded up |
| b) PT to FT: SE* for FT programme = NCD of new FT programme – (Number of subsidised semesters consumed under original PT programme / 2), rounded up |

*Subsidy Eligibility. Refer to Annex A for the full glossary.

The transfer funding framework is elaborated in Annex B with examples shown in Annex C.

Note: Please note that all calculations are subject to verification with the AUs to ensure accuracy.

NUS is authorised to obtain and verify the information provided by student or otherwise, with any source as it deems appropriate. In the event of inaccurate, incomplete or false information given by student regarding previously consumed and eligible MOE Subsidy for graduate programmes, NUS may at its discretion withdraw any offer of admission made or, if already admitted, may be liable to disciplinary action, which may result in expulsion from NUS.
Note:

1 International students admitted from Semester 1 of AY2015/16 are no longer eligible for MOE Subsidy and would be required to pay full fees unless they are on MOE Research Scholarship or sign the MOE Service Obligation Agreement.

2 Students who are not eligible for MOE subsidy are also not eligible for some scholarships, such as, the President’s Graduate Fellowship, NUS Research Scholarship, Tuition Fee Allowance, ISEP Scholarship, etc.

3 Autonomous Universities refer to NUS, Nanyang Technological University (NTU), Singapore Management University (SMU), Singapore University of Technology and Design (SUTD), Singapore Institute of Technology (SIT) and Singapore University of Social Sciences (SUSS).

4 For graduate coursework programmes done on a part-time basis, the subsidy for two semesters of part-time studies is equivalent to one semester of full-time studies. For graduate research programmes, there is no differentiation in subsidy between full-time and part-time studies.

5 For graduate research programmes, the subsidy is up to the Maximum Candidature (MCD) period, which is three (3) years for full-time and part-time Masters by Research, and five (5) years for full-time and part-time PhD programmes. There is no differentiation in subsidy between full-time and part-time studies. NUS will continue to subsidise the tuition fees for those who exceed the maximum candidature period.

6 Normal Candidature (NCD) Period of MOE-subsidised Graduate Coursework programmes can be found here.

</tr>
</thead>
</table>
| 1   | [For AUs on EBF only] Transfers between the same modes (FT or PT) of GDCs | Assuming:  
- GDC NCD is one year (i.e. two semesters) for original GDC, and two years (i.e. four semesters) for new GDC  
- Student has completed one out of two semesters for the original GDC  

Remainder subsidy duration for new GDC:  

\[
4 \text{ semesters NCD for new GDC} \times \frac{1 \text{ remaining semesters in original GDC}}{2 \text{ semesters NCD for original GDC}} = 2 \text{ semesters}
\]

| 2   | [For AUs on EBF only] Transfer between different modes of GDCs (FT to PT or vice versa) | a. FT to PT  
Assuming:  
- GDC NCD is one year (i.e. two semesters) for FT students, and two years (i.e. four semesters) for PT students  
- Student has completed one out of two semesters for the FT GDC  

Remainder subsidy duration for PT GDC:  

\[
4 \text{ semesters NCD for PT GDC} - (2 \times 1 \text{ semester subsidy consumed in FT GDC}) = 2 \text{ semesters}
\]

b. PT to FT  
Assuming:  
- GDC NCD is one year (i.e. two semesters) for FT students, and two years (i.e. four semesters) for PT students  
- Student has completed three out of four semesters for PT GDC  

Remainder subsidy duration for FT GDC:  

\[
2 \text{ semesters NCD for FT GDC} - \left(\frac{1}{2} \times 3 \text{ semesters subsidy consumed in PT GDC}\right) = 0.5 \text{ semesters} \approx 1 \text{ semester (rounded up)}
\]
