From 17 Sep 2024, all new IACUC applications must be submitted through the iRIMS-IACUC (Animal Oversight) module. Any new application submitted via the Integrated Online Research Compliance (iORC) system <u>will be rejected</u>.

Subsequent amendment, renewal and closure of any iRIMS-IACUC application will have to be made through the iRIMS-IACUC (Animal Oversight) module.

For IACUC applications which have already been approved in the iORC, amendments to them must be made and submitted via the iORC until the application is closed or expired.

Any protocol that has been reviewed by the IACUC more than a year ago but not approved will be removed in the iORC. You are required to submit a new application via iRIMS for IACUC to review it. This is in accordance with the IACUC SOP in which applications that have not been approved within a year from the IACUC meeting date will have to be re-submitted for IACUC review.
