

FAQs on Verification of Overseas COVID-19 Vaccination and Serology Testing

Who can get their overseas COVID-19 vaccination records updated into the National Immunisation Registry (NIR)?

Singapore Citizens (SCs), Permanent Residents (PRs), and Long-Term Pass (e.g. Long Term Visitor Pass, Work Permit, Employment Pass, S Pass, Student Pass, and Dependent Pass) holders who are fully vaccinated overseas with COVID-19 vaccines authorised by the Health Sciences Authority under the Pandemic Special Access Route (PSAR) or listed on the World Health Organization's Emergency Use Listing (WHO EUL) can get their overseas vaccination records updated into the National Immunisation Registry (NIR).

Is this service available for partial vaccination done overseas?

No, this service is available for fully vaccinated individuals only.

Will the results of serology testing done overseas be accepted in Singapore?

No, serology testing needs to be done in Singapore.

Can I proceed with the serology test if I'm not feeling well (e.g. down with flu/ fever)?

No, you should not proceed with the serology test if you are down with flu, fever, cough or sore throat. You will have to undergo a swab test and stay home for the duration of MC and/or until the notification of a negative COVID-19 swab test result.

If I was vaccinated in Singapore, can I request for a serology test to confirm that my vaccination was effective?

There is no need for you to request for serology testing after receiving your COVID-19 vaccination locally, as serology testing is not required to verify your vaccination status.

Will other vaccination taken recently affect the serology test result?

No, it will not have any effect.

What will the charges be?

The charges will be \$45.00 inclusive of GST.

What are the modes of payment available?

The modes of payment available are cash, NETS and Credit Cards.

Will the serology test be claimable under insurance?

No, the serology test will not be claimable.

How soon can I know my serology test result?

The result will be emailed to you within 1 week.

What should I do if I receive a negative serology test result?

A negative serology result implies that you may not be protected from COVID-19 infection. You are advised to take the vaccination in Singapore by checking your eligibility and registering at <https://preregister.vaccine.gov.sg> or call the MOH COVID-19 hotline at 1800-333-9999 for assistance.

FAQs on Verification of Overseas COVID-19 Vaccination and Serology Testing

Where can I view my overseas COVID-19 vaccination records/ status?

If your serology test is positive, we will inform you via email within 1 week, and we will update your overseas vaccination data into NIR. You can then view your vaccination record on HealthHub (HH) app within 3 days. MOH is working on having this also shown on the TraceTogether (TT) app by end August 2021.

How do I change/ cancel my appointment?

Please note that once you have scheduled a confirmed appointment, **your appointment is final**. If you have any queries regarding your appointment, please email uhcnsy@nus.edu.sg

More information on recognising overseas vaccinations is available on the [MOH website](#).
