3 Things to Know About Human Papillomavirus (HPV)

#1 An estimated 8 in 10 people will get HPV at some point in their lifetime[^].

#2 HPV affects both males and females.

#3 HPV is the cause of almost all cervical cancers, as well as genital warts, among others.

Special rate
\$200 per dose
19 January - 20 March
While stocks last

Please read the Terms & Conditions before your vaccination.

For a limited time, a *special rate* will be offered at the University Health Centre for all NUS staff and students up to the age of 45 years old.

[Schedule an appointment today.](#)

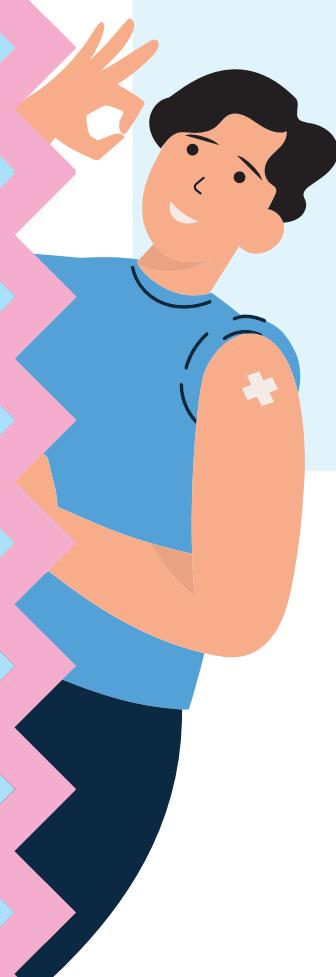

* The current promotional rate is inclusive of GST and is only valid during the stipulated promotional period. It is not applicable for subsequent doses. Thereafter, the regular price of \$220.00 per dose (inclusive of GST) and consultation charges will apply. Rates are accurate as of 12 January 2026.
